# New Certified Organic Ananda toner from Antipodes

Waiwera mineral-rich water, which has been voted the world's best water\*, is used to deliver skin-nourishing antioxidants & nutrients to the epidermal layer in a new certified organic toner.

**Ananda Antioxidant-Rich Gentle Toner** from organic New Zealand beauty brand Antipodes® features pure New Zealand artesian water from deep within the earth, to deliver to the skin high levels of natural minerals.

Whereas traditional toners often strip the skin of natural moisture, exposing the epidermis to further damage, Antipodes® Ananda toner offers blissful hydration whilst calming the skin and nourishing it with antioxidants and nutrients.

Use of a premium organic toner can dramatically improve the skin's texture and its ability to absorb essential nutrients, and is a must-have part of a daily beauty ritual.

**Ananda Antioxidant-Rich Gentle Toner** fosters healthy skin cell turnover with **mamaku black fern**, along with **raspberry extract** that is high in omegas to help strengthen stressed and delicate skin.

Ananda has dermatological approval for sensitive skin\*\*, and is also suited to sensitized and normal skin conditions. Its light and enchanting scent features exquisite **Bulgarian rose oil**, with the petals of thousands of handpicked roses required to make a single precious drop.

A good organic toner is a proactive anti-ageing tactic in any serious skincare routine – for both men and women – and can help protect sensitized and sensitive skin from ageing by boosting water hydration levels which decrease as we age.

A toner should be misted across the face and neck after cleansing with an oil-based or cream cleanser, & before applying a serum and moisturizer, as well as throughout the day over make-up for an immediate moisture boost and relief from environmental aggressors.

The other certified organic toner in the Antipodes® range is **Resurrect Facial Toner** with lavender, sweet sage and chamomile. It is best suited to normal and oily skin conditions, and will help to minimise visual and open pores, and refine the skin's texture.

Antipodes® certified organic and natural skincare is currently sold in seven countries as well as 120 stores throughout New Zealand.

\* Voted 'World's Best Water' of premium bottled waters, Decanter magazine (2008)

\*\* Tested on 50 women by an independent New York laboratory
