Nature's nurture you won't want to live without

Antipodes® Joyous Protein-Rich Night Replenish Serum

Skin damage by day calls for replenishment every night. Antipodes® new Joyous Protein-Rich Night Replenish Serum is an intensive natural treatment to help assist and repair damaged and ultra-dry skin by night.

Designed to help support and intensify the collagen-boosting properties of Avocado Pear Nourishing Night Cream, it's an essential first step for anyone concerned by signs of ageing, including sun-damage.

Restore collagen & elastin

Independent in-vitro scientific studies show Joyous Protein-Rich Night Replenish Serum is scientifically shown to stimulate synthesis of elastin by an impressive 60.5%. It contains a concentrated extract from the vibrant Himalayan goji berry with up to 19 amino acids, and a base of super-fruit oils featuring red raspberry seed and New Zealand blackcurrant – both high in essential fatty acids. Help intensify the collagen boosting of Avocado Pear Nourishing Night Cream, by using these two products in combination.

Deliver natural radiance

This luscious oil-based serum offers a dewy glow to sun-damaged and mature skin. A premium extract of subtropical hibiscus flower with pyruvic organic acid to slough off dead skin cells freshens and plumps your complexion. Joyful fragrances of sweet summer berries bring bliss to your daily night-time ritual.

Purify & protect

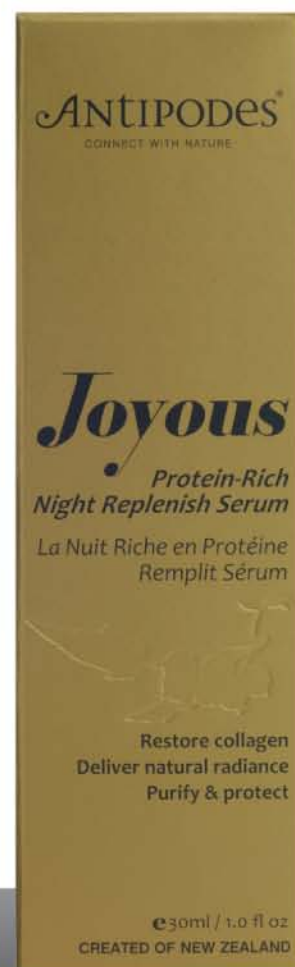

Joyous Protein-Rich Night Replenish Serum is a rich natural source of essential fats like gamma-linolenic acid (GLA) that help protect and deeply hydrate the skin.
