Reincarnation Pure Facial Exfoliator

“Replenishing the skin’s vitality”

The vibrant red flowers of the New Zealand summer tree – the Pohutakawa – are a key ingredient of the Antipodes[®] Natural Reincarnation Pure Facial Exfoliator.

The Pohutakawa, which grows naturally in New Zealand’s coastal areas, explodes in a blaze of colour each December. Much admired for its Yuletide, beauty, the Pohutakawa has another hidden strength; its flowers are rich in ellagic and gallic acid, natural essences which deeply moisturise and condition when combined as a skincare treatment.

Exfoliation is an important part of any beauty routine, removing lifeless skin while replenishing vital nutrients. The Antipodes[®] Reincarnation Pure Facial Exfoliator nurtures the skin during this innate regeneration process by cleansing, hydrating and balancing.

This unique exfoliator, designed by the scientifically validated beauty brand Antipodes[®], includes a creamy, moisturizing base of antioxidant-rich avocado and jojoba bean oils, combined with calendula and carrot seed extract to clear and revitalize facial skin. Added to this are essential oils of sandalwood, sweet orange and tonka bean, soothing fragrances which restore balance and calm.

The Antipodes[®] Natural Reincarnation Pure Facial Exfoliator is a gentle beauty treatment, ideal for all skin conditions and recommended for use twice weekly.

Antipodes[®] certified organic and natural skincare is currently sold in seven countries as well as 220 stores throughout New Zealand.
